## Healthcare

### Level 4 HNC Healthcare Practice Course

The HNC Healthcare Practice course is tailored for those aiming to work within this field. In this course, you'll blend theoretical knowledge with hands-on experience essential for various healthcare roles. You'll gain a deep understanding of several key areas, including law, policy, and ethical practices within the industry.

### Level 5 HND Healthcare Practice Course

Our Healthcare Practice HND is designed to shape learners into competent, self-reflective professionals ready to meet the evolving demands of the healthcare sector. This qualification is designed to advance your expertise and broaden your skillset, equipping you for leadership and specialised functions in healthcare settings.

# Higher Education Courses

David Warnes, Principal

Chelmsford College has worked with employers and stakeholders from across the region to provide higher education courses that address skills shortage in key sectors such as construction, engineering, health and digital.

Our HNC's and HND's (Higher Technical Qualifications) present an exciting new pathway for individuals aged 18 and above, to study locally and are more affordable, without having to take on a large student loan debt.

The courses also provide an opportunity for those already in work to fast-track their careers, with the option of being sponsored by their employer. Working closely with partner universities, many of our courses offer the opportunity to 'top-up' to a full degree after 1 or 2 years.

The College has invested in a new Higher Education Centre, a state-of-the-art health care simulation 'ward' and new digital immersive labs, providing a high-quality learning environment for those looking to continue their education beyond level 3 or return to studying after a break.
