

AI FOR COMPLIANCE, RISK, & LEGAL

How AI can support your team

AI can help compliance, risk and legal teams research and organise information, identify emerging risks, and support more consistent monitoring and review. It can also strengthen understanding of ethical use, security compliance and the controls needed to adopt AI responsibly.

RECOMMENDED STARTING POINT

AI for Legal Professionals

Professional certification: AI CERTs® AI+ Legal Practitioner™

Practical Outcomes

- **Legal research:** Use AI to organise and analyse information.
- **Document support:** Apply AI to contracts and legal material.
- **Risk awareness:** Understand privacy, ethics and compliance.
- **Practical application:** Explore AI within legal workflows.
